NEW HARDY

Iron-Clad Ever-Blooming Rose —New Century—

(CLOTILDE SOUPERT × ROSA RUGOSA ALBA)

THIS magnificent Rose was originated by the noted American Hybridizer, Dr. W. Van Fleet of the RURAL NEW YORKER, who first called our attention to it; and after two years careful trial on our own grounds, we were so fully convinced of its great value that we purchased the entire stock, and now offer it for the first time. It is most appropriately named **New Century** as it represents a new and distinct race of Hardy Continuous-blooming Roses, entirely different from the old Ever-blooming varieties. **NEW CENTURY** is a stout upright grower, making a strong compact bush of bold erect habit, and well furnished with bright glossy green foliage. It is entirely hardy in all localities where the temperature does not fall below 30° below zero, and it is believed it will stand 40° to 50° below with slight protection. It should be planted in good rich ground and well fertilized with stable manure, as a rose of this vigorous character requires good feeding for best results. It is also well to cut back the plants strongly every Spring, and again, to some extent, after the first bloom is over, which treatment will encourage new growth and fresh bloom.

NEW CENTURY FLOWERS are extra large, fully three to four inches across, perfectly full and double, and borne in magnificent clusters: the color is bright rich carmine rose, with deep red centre, and the petals are widely bordered with fine creamy white—as shown in the Colored Plate. It is very sweet and has the delightful fragrance of the Wild Rose or Sweet Briar. Although the New Century is one of the hardiest of all roses, and therefore particularly recommended for the coldest sections of the Great Northwest and Canada, it is equally satisfactory for planting in all parts of the U. S., and we recommend it as the hardiest and most distinct Continuous-Blooming Bush Rose for garden planting yet produced. **New Century** is particularly valuable for planting with hardy shrubbery in lawns, parks and cemeteries, where its splendid flowers and delightful fragrance will be a constant delight during the whole season.

THE TERM—IRON-CLAD EVER-BLOOMING ROSE describes it exactly. As, besides its extreme hardness, it seems absolutely impervious to the attacks of insects, rust and blight which are so fatal to other roses. **New Century** is the first representative of this New Race of Iron-Clad Ever-Blooming Roses, which will, undoubtedly, soon take an important place in garden planting in this country and Europe.

PRICE—Strong plants from 3-inch pots, 50 cts. each; postpaid. Two-year size, \$1.00 each, express. Extra size three-year bushes, \$1.50 each, by express.

NEW PINK AMERICAN BEAUTY—This famous New Rose originated four years ago, near Philadelphia, as a "sport" of the well-known **American Beauty**, of which it is an exact counterpart in every particular except color; it has the same vigorous growth and beautiful foliage, the same exquisite fragrance. The color is a lovely shade of bright clear pink, very beautiful. The flowers are large and very deep, averaging over five inches across, and are borne on long stiff stems. It is offered for the first time, this Spring, and as the stock is limited, and the demand great, the price is necessarily high. **PRICE: Nice Mail Plants, ready April 15th, \$1.00 each; \$9.00 per dozen, postpaid.** Read the press comments below.

HOW TO GROW FLOWERS

Many people know how to grow flowers and consequently get an immense amount of pleasure from them. Many more would thoroughly enjoy having flowers of their own if they could only have success in growing them. In reality it is just as easy to succeed with flowers as otherwise. But to have them do well, they must be given the attention they need. There are two ways through which to learn how to grow flowers. You may make repeated experiments yourself, and thus arrive at the proper understanding of the requirements. This is a tedious and sometimes costly process. On the other hand, you may avail yourself of the experiences of others who have already covered the ground. Subscribe for a good Floral Magazine, and read it; in this way you can avoid failure and attain success with all your floral treasures. It is cheapest and quickest.

"HOME AND FLOWERS," an Excellent Magazine

This Splendid Monthly Magazine is published in Springfield, Ohio, for the amateur flower grower. It is not technical, but is helpful, useful and practical. Home and Flowers tells when, how and what to plant, when and how to prune, when and how to mulch, how to protect plants in Winter, how to get rid of insects, the water and heat needed by flowers, how to bed out plants, the best varieties, about floral decorations, and, in short, gives complete directions for success with flowers. Home and Flowers is the only independent publication in America that is devoted to floriculture. It is also the recognized organ and exponent of the movement for public beauty and civic improvement, as represented by Improvement Associations and Leagues, and each number contains valuable suggestions for the beautifying of homes, lawns, streets, parks, etc. Thirty-six large pages printed on fine book paper, illustrated with half-tone engravings made from photographs. In the field of floral publications "Home and Flowers" is the leader.

HARDY HYBRID PERPETUAL ROSES.

THE Hybrid Perpetuals are considered the most valuable of all Roses, because they bear the largest, sweetest and most brilliant colored flowers, and are so hardy and vigorous they live over Winter without protection and continue to bloom regularly from year to year. Their grand flowers are of all shades of red, crimson scarlet, pink and white, but no yellows. They thrive and bloom finely in all sections of the country and should generally be planted in open ground, as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time, and occasionally during the Summer and Fall months. Though called "Perpetual," they are not constant bloomers, but are the finest and most beautiful of all Hardy Roses! We offer the Choicest and Most Beautiful Varieties in Cultivation, and send Strong Healthy Plants from 2½ and 3-inch Pots all on their own Roots. Persons who order at the single rate may select to value of 20 cts. additional on every dollar sent.

Acalypha Sanderi, or Comet Plant.

and bronze green, beautifully veined with red, the under side being dark, rich crimson. Extra fine for window boxes, vases and pots, and when given a small trellis a foot or two high for support, soon makes a parlor plant of almost unequalled beauty. It likes heat and moisture, and may be kept growing all the time or dried off and rested when desired. **Strong Plants, 15 and 20 cts. each, postpaid.**

New Crimson Chenille Plant

(*Acalypha Sanderi* or Comet Plant)

THIS cut is a representation of the plant as it really appears, and is not at all overdrawn.

It grows 10 to 12 inches high, blooms quickly and abundantly, and the flower tassels grow as long as the plant is high. They are covered all over with fine crimson flowers, looking almost exactly as if made of crimson chenille or silken plush. The plant likes heat and moisture, and good rich soil, but grows easily and blooms so quickly that many are beginning to flower when sent out. When warm weather comes, set out in the flower bed, and it will grow the whole season. A most surprising Fall novelty and a great curiosity. **Strong Plants, 15, 20 and 25 cts., postpaid. Extra size, 35 and 40 cts. each, by express.**

Cissus Discolor or CLIMBING BEGONIA

Not a true Begonia, but an elegant vining window plant, having as richly colored foliage as the finest Painted Leaf Begonias. Has long heart-shaped leaves with a rich metallic lustre. Exquisitely marked in different shades of silver

New Passion Flower Southern Beauty (AMERICA)

Unlike most other Passion Vines, this splendid new variety, besides being exquisitely beautiful, is a strong vigorous grower and entirely hardy; will climb up a trellis 10 to 20 feet high in a season, and cover it all over with splendid wreaths and clusters of large handsome flowers and foliage. The flowers are four to five inches across, and the color is an elegant combination of red, white and blue shades, so entirely unique and striking, that they attract attention at once. The form of the flowers, though much reduced in size, is well shown in the engraving, and as the foliage is handsome also, it can be recommended as one of the choicest and most beautiful hardy flowering vines now offered. In very exposed situations, the roots should have a covering of leaves or litter before severe freezing; they can then remain in the ground over Winter and will bloom every season for years.

GOOD STRONG ROOTS, 20 cts. each; 3 for 50 cts.; \$1.50 per dozen, postpaid.

IMPORTED**Japanese Fern Balls**

Japanese Fern Ball.

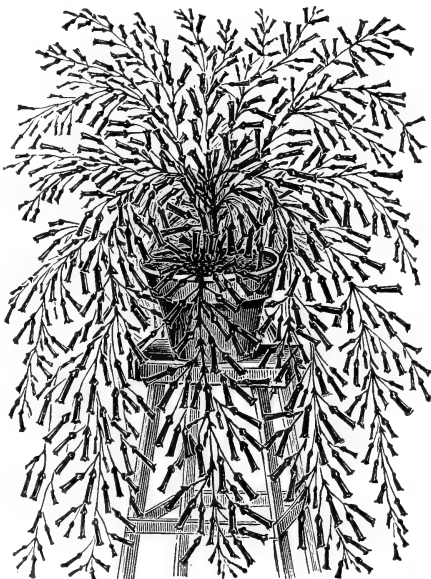

Japanese Fern Balls are a great novelty just recently imported from Japan, and offered last year for the first time. The illustration gives some idea of their exquisite beauty. The roots are twisted and worked together in a ball-shape, about eight inches in diameter; **they come dry, and only need wetting**, and moderate warmth to start the pretty fronds into lively growth and beauty, they may be hung in a window and kept moist by dipping occasionally in a pail of water, or they may be placed in a basket or vase—are very beautiful everywhere. They have proven very popular and are being extensively bought by flower lovers in all parts of the country. **75 cts. each; 2 for \$1.25, postpaid; 60 cts. each, express at purchaser's expense.**

New Russelia Elegantissima**SCARLET FOUNTAIN PLANT**

This is a new and most charming plant for pot-culture and Winter bloom. It has long slender wiry stems which grow in graceful drooping masses, flowing like hair, and bearing great quantities of long tubular flowers, of the brightest scarlet color. It is a novel and beautiful plant, particularly suitable for pots, baskets and vases; it blooms the whole year but most profusely during the Winter and Spring months, when the well-filled pots look almost like fountains of bright scarlet and deep green. It is one of the easiest plants to grow and one of the brightest and best bloomers for house culture. A valuable addition to any collection. **15 cts. each; \$1.50 per dozen, postpaid.**

Solanum Jasmonoides Grandiflora

This is a very beautiful house plant, which may be either grown as a climbing vine, or kept in bush form by pinching back. A most abundant bloomer, covering itself all over with large clusters of pure-white star-shaped flowers; begins blooming while quite small, is always full of flowers whether kept as a pot-plant or bedded out. **15c. each, postpaid.**

C. & J. VELVET GREEN LAWN GRASS SEED.

THE BEST BRAND FOR SEEDING DOWN NEW LAWNS AND RENOVATING OLD ONES.

OUR VELVET GREEN LAWN GRASS SEED is not excelled by any for producing a smooth, even, velvety-green sward that will withstand drought and hard usage, and always makes a handsome appearance. In seeding down a lawn or grass plot, three things are necessary to insure success: First, to prepare the ground so as to have a fine, smooth seedbed; second, to put on plenty of seed, never less, but rather more than the directions call for; third to start the lawn-mower as soon as the weeds (which are always in the ground and sure to start first) are tall enough to catch, and keep them mowed off close till the grass has time to start and become well-established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top-dressing when needed. One quart of seed is enough for three-hundred square feet (fifteen by twenty feet), or at the rate of five bushels to the acre. Lawns should be kept neatly mowed, which induces a clean, even growth of fresh lively green.

Price by mail, postpaid 25 cts. per quart; two quarts for 45 cts.; in bulk, purchaser paying express charges \$1.25 per peck; \$4.00 per bushel of 20 lbs.

We want your orders, and whether large or small they will have our best attention.

Premiums on Flower Seeds in Packets. Our prices are very low, but persons sending 50 cts. or more for seeds in pkts. or ounces, may select to the value of 10 cts. extra, dollar orders 20 cts. extra, but no premium can be allowed on seeds ordered by the $\frac{1}{4}$ pound or upwards, or on lawn grass, or any special collection of seeds, and these cannot be given as premiums.

Hints on Growing Flowers from Seeds. Always buy **C. & J. Surpassing Flower Seeds**; they are the best. A dollar's worth of **C. & J. Surpassing Flower Seeds** will produce many times as many flowers as the same amount expended in plants.

Any ordinary soil will grow beautiful flowers. Make it fine and mellow, plant at proper time, keep clear of weeds, and Nature "will do the rest."

Do not plant when ground is wet and soggy, or it may bake so hard as to prevent the little plants from coming through.

Do not cover too deeply, very fine seeds should be merely pressed in with the hand; see printed directions sent with every order.

Do not allow plants to stand too thickly; weed out or transplant if necessary; if crowded they cannot bloom satisfactorily. A home adorned with beautiful flowers is sure to be happy and prosperous.

Transplanting. Nearly all flowers are improved by transplanting, except Sweet Peas and Poppies which are usually sown where they are to grow. By starting them in Boxes, Hot Beds or Cold Frames, and transplanting, you escape danger of frost and secure the largest and finest flowers.

Choice New Garden Fruits

EVERY person who has a garden needs some of our **Choice New Garden Fruits**; they take very little room; they come into bearing quickly, and will repay their trifling cost many times over in delicious fruit, besides the pleasure and satisfaction of having them of your own. The varieties offered below are the very finest sorts, and it will pay you to give them a liberal trial this year.

New Dwarf Bismarck Apple

A Half-Dozen Bismarck Apple Trees, in Bearing—Price, \$1.25, postpaid.

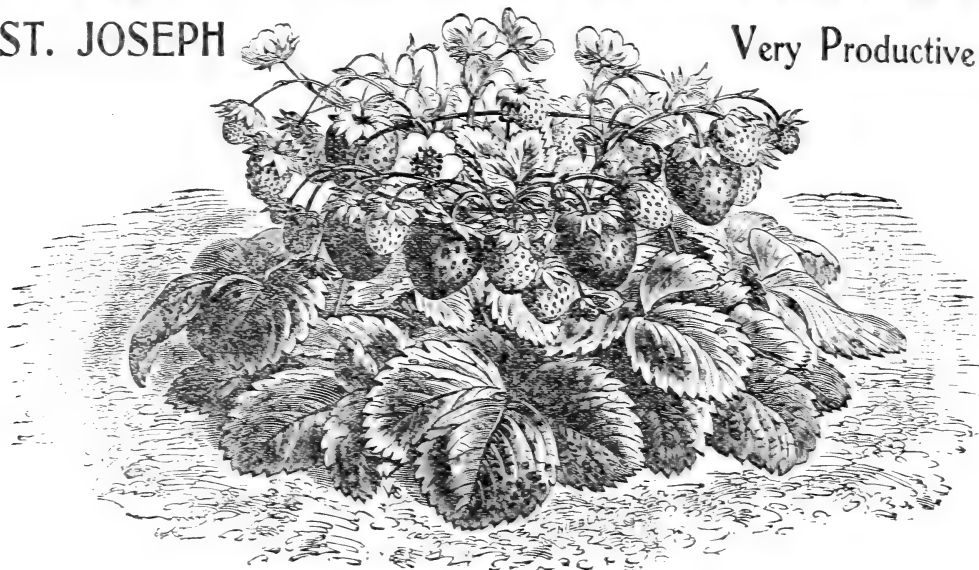

WE take pleasure in recommending this wonderful **New Dwarf Apple** for planting in gardens and yards, where fine fruit are desired, but not room for large trees. It is said to have come from New Zealand, but has now been fully tested in this country, and proved to be a most valuable variety; very remarkable for its dwarf growth, and surpassing all others in early bearing. Little trees, not over a foot or two high, will frequently bear large apples a few months after planting, and all may be expected to bear abundantly in a very short time. They are so dwarf they can easily be grown in pots or boxes, if desired, but are especially recommended for small gardens and yards where there is not room for large trees. You can grow them in any vacant corner, and have some delicious fruits of your own. The apples are of large size, beautifully rich golden yellow streaked with red; they ripen early and are of the most delicious quality. We can recommend the Bismarck Apple as a most valuable variety for situations noted above. May be planted only three or four feet apart, along fences or buildings, and will soon bear abundantly.

PRICE: Nice, One-year Trees, 25 cts. each; 6 for \$1.25; \$2.50 per dozen, postpaid. Larger size, 35 cts. each; \$3.50 per dozen; Extra size, 50 cts. each; \$5.00 per dozen, by express, at purchaser's expense.

...BLACKBERRY

RATHBUN**THE NEW RATHBUN BLACK-**

BERRY—Another season's trial in many different localities, has fully confirmed our belief in the great value of this remarkable Berry; and we therefore **take pleasure in recommending the New Rathbun as the very best for family use** of which we have any knowledge. It is such a vast improvement on all the older Blackberries that it can almost be classed as a **new fruit**. The berries are of enormous size; forty-five of them have measured a full

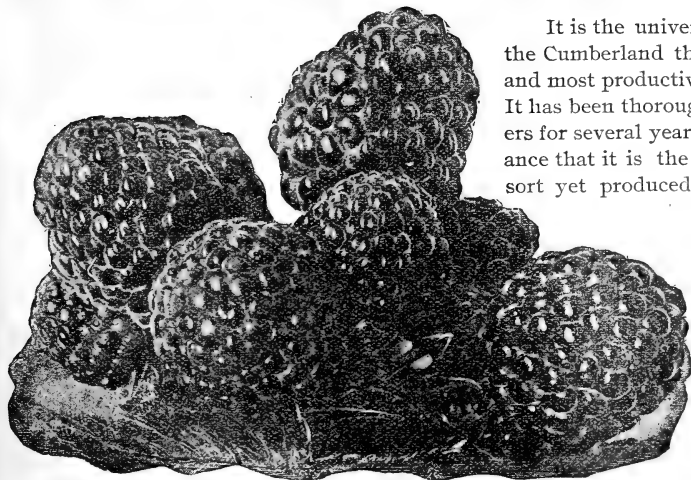

quart; the flavor is delicious, very rich, sugary, and melting, without any hard core. The canes are of tree habit, growing strong and erect; are entirely hardy, and marvelously productive; do not sucker, but root from the tips. The color is deep jet black; very handsome. They bear and ripen early, and of all the blackberries ever introduced, we can safely recommend this as the best, and especially for family use. It is undoubtedly one of the choicest and most valuable garden fruits you can plant. **15 cts. each, 2 for 25 cts.; \$1.00 per dozen.**

THE LUCRETIA DEWBERRY—This is well-known and highly valued for garden planting; it ripens a little before blackberries; the berries are often one and one-half inches long by an inch in diameter, sweet and luscious to the centre. It is very productive; a dozen plants will supply quite a large family, equally good

raw or cooked. It is one of the very earliest and best of our garden fruits. **10 cts. each, 3 for 25 cts.; 75 cts. per dozen, postpaid.**

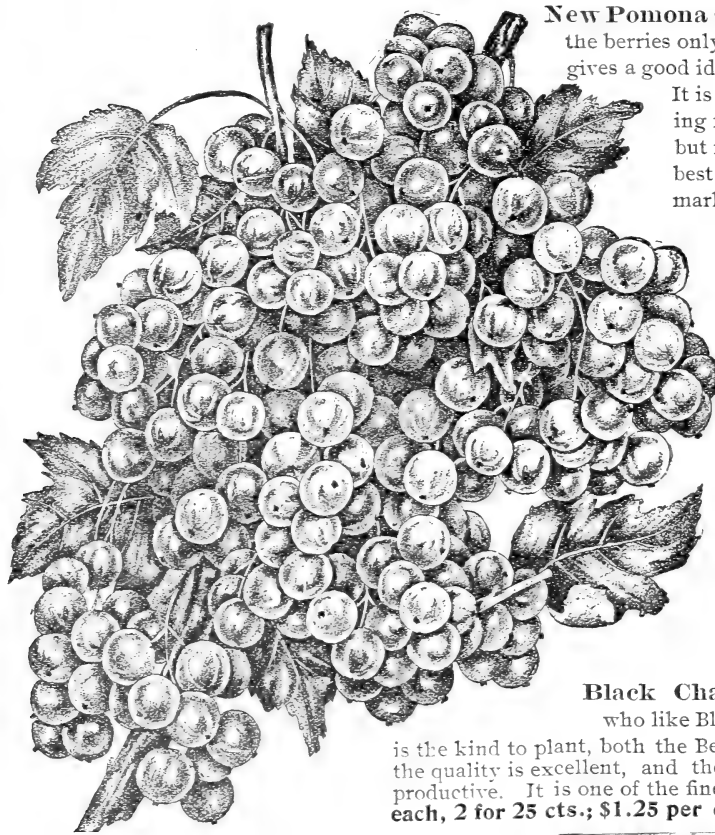

NEW WHITE BLACKBERRY, "ICE-BERG"—This is not offered as a curiosity, but as a veritable luscious, hardy and productive fruit, fully equal to the best blackberries in flavor and quality, with the additional advantage of variety of color. It seems to have been a chance seedling discovered in California, growing among others and attracting attention by its canes bending in all directions, with their load of delicious, snowy berries, which are not only white, but so transparent that the seeds may be seen in the berries when ripe. Berries are large, borne in fine clusters; the plants are vigorous and productive; and it makes a handsome addition to our list of garden fruits. **Good strong plants, 15 cts. each, 2 for 25 cts.; 1.00 per dozen.**

NEW GIANT BLACK RASPBERRY CUMBERLAND

New Giant Black Raspberry, Cumberland.

It is the universal verdict of all who have tried the Cumberland that it is the largest, finest flavored and most productive Black Raspberry they ever saw. It has been thoroughly tested by western fruit growers for several years, and is sold with the full assurance that it is the most profitable and best market sort yet produced. It is an enormous bearer, the Berries are of immense size, and most excellent quality, and always bring the Highest Price. The vine is a strong vigorous grower and entirely hardy, makes no suckers, roots from tips and is one of the most valuable kinds, both for market and family use. **15 cts. each; 2 for 25 cts., \$1.00 per doz., postpaid. Two-year, 25c. each, \$2.50 per doz., by express.**

THE BEST NEW CURRANTS

New Pomona Currant—Our illustration shows the berries only about one half natural size, but gives a good idea of its enormous productiveness.

It is highly recommended by all leading fruit growers who have tried it; has but few seeds and is the sweetest and best of all currants. When grown for market has averaged over 400 dollars per acre for several consecutive years. **Strong plants, 15 cts. each, 2 for 25 cts.; \$1.35 per doz., postpaid. \$6.00 per hundred, by express.**

Fay's Prolific Currant—The largest and one of the best and most productive red currants ever grown, unexcelled for family use. **15 cts. each, 2 for 25 cts.; \$1.25 per doz. postpaid.**

White Grape Currant—The best White Currant; large size; very handsome and productive. **15 cts. each, 2 for 25 cts.; \$1.25 per dozen, postpaid.**

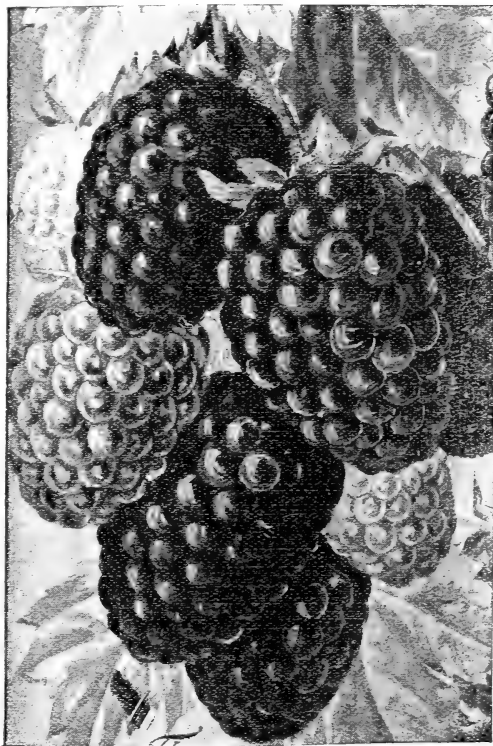

Black Champion Currant—For people who like Black Currants, the Black Champion is the kind to plant, both the Berries and Bushes are very large; the quality is excellent, and the Bushes are hardy, vigorous and productive. It is one of the finest of all Black Currants. **15 cts. each, 2 for 25 cts.; \$1.25 per dozen, Postpaid.**

THE WONDERFUL New LOGAN BERRY

(BLACKBERRY RASPBERRY.)

This grand new Berry originated in California but has been tested here for several years. It makes a strong vigorous bush, and is quite hardy unless in very exposed situations where slight protection may be advisable. It seems to be a true Hybrid between the Raspberry and Blackberry, partaking of the nature of both in quality and appearance but of finer and more delightful flavor. The Berries are the size of the largest BLACKBERRIES and of a rich dark purple red, entirely different and much larger than any other Blackberry. It bears abundantly, the fruit has very few seeds, ripens early before blackberries, and is of such superior quality for cooking and eating that it has brought four times the price of other berries in market. It is well worthy of careful trial by every one interested in New Fruits, as it is very handsome and entirely different from all other berry fruits. **15 cts. each, 2 for 25 cts.; \$1.50 per dozen, postpaid. \$6.00 per hundred, by express.**

Description of the EIGHT SPLENDID NEW CANNAS in Colored Plate

ALL ORIGINATED BY THE CONARD & JONES CO.

NEW ROSE-PINK CANNA, LURAY—This was one of the most beautiful and satisfactory Cannas we had last season among all our choicest varieties. It makes fine, shapely plants $\frac{3}{4}$ to 4 feet high, with fine foliage and large, massive heads of splendid bold flowers—clear bright rose-pink, an exquisite color, very showy and handsome, and the flowers are so durable they retain their beauty through all kinds of weather. It is an early and continuous bloomer, and one of the handsomest and most valuable kinds in the whole list. Dormant roots, 25 cts.; potted plants, 30 cts., postpaid.

NEW CRIMSON CANNA, DUKE OF MARLBOROUGH—Dark, rich velvety maroon almost black, fine shapely flowers in large, well-filled trusses. A vigorous grower and early and abundant bloomer. Whether you want one plant or one hundred, do not omit The Duke. Dormant roots, 15 cts.; potted plants, 20 cts., postpaid.

NEW WHITE CANNA, ALSACE—This is the nearest approach to a pure white Canna yet produced, and the finest of this color to date; makes fine, shapely plants $\frac{3}{4}$ to 4 feet high and bears large handsome trusses of lovely creamy white flowers all through the season. Dormant roots, 15 cts.; potted plants, 20 cts., postpaid.

NEW EVER-BLOOMING CANNA, ORANGE QUEEN—A fine dwarf, compact grower, very free bloomer; color, fine orange-gold, very striking and beautiful, and the finest of this lovely color. Dormant roots, 15 cts.; potted plants, 20 cts., postpaid.

BUTTERCUP—True bright buttercup yellow; large, beautifully formed flowers in fine, large, handsome trusses; stands unfavorable weather better than most any other kind and always shows up bright and clear, and is undoubtedly the best and most beautiful pure, bright, deep-yellow Canna yet produced. Height, $\frac{3}{4}$ feet. Dormant roots, 25 cts.; potted plants, 30 cts., postpaid.

NEW CHERRY-RED CANNA, BALTIMORE—Rich, bright cherry-red with golden-yellow markings at throat, makes nice well proportioned plants $\frac{3}{4}$ to $\frac{3}{8}$ feet high, and bears large erect spikes of splendid bright red flowers. An early and constant bloomer; first-class in every way. Dormant roots, 15 cts.; potted plants, 20 cts., postpaid.

QUEEN ELEANOR—The finest yellow spotted Canna. Grows $\frac{3}{4}$ to 4 feet high, very symmetrical and handsome, an early and constant bloomer; fine full spikes of large beautifully formed flowers; color rich golden yellow, elegantly dotted all over with bright scarlet; exceedingly beautiful. Dormant roots, 15 cts.; potted plants, 20 cts., postpaid.

GLORIOSA, the new Gold-Edged Canna—Superb flowers, middle of petals dark rich crimson, widely bordered with deep golden-yellow; a quick and continuous bloomer, very dwarf, compact grower, fine for borders and edging, very showy and handsome. Dormant roots, 15 cts.; potted plants, 20 cts., postpaid.

Special Offer:: The complete set of Eight Splendid Color Plate Varieties described above—fine Dormant Roots, only \$1.00, postpaid, or same in Potted Plants, \$1.35, postpaid, or \$1.15, if sent by express at purchaser's expense. Purchasers who would like one-half this Set can have either Luray or Buttercup and any three others they like, 4 in all, Dormant Roots, 50 cts., or Potted Plants, 7 cts., postpaid.

NOTE All Cannas we send out, both Dormant Roots and Potted Plants, are ready for planting at once, as soon as the ground is warm and weather settled, but if received earlier than this, they should be grown in pots or boxes in the house till time to set out, as they cannot bear much cold. See cultural directions sent with every order. They grow very easily, and our Dormant Roots with proper treatment will bloom nearly as quick as the Potted Plants. Please notice however that Dormant Roots can only be furnished up to May 1st. After that time we will have Potted Plants only, and when Dormant Roots cannot be sent, we will send equal value in Potted Plants. It is always best when convenient to have potted Cannas sent by express so that some earth can be left on the roots, and as we make a special reduction to those who order sent by express, it costs very little more, and is the best way for started plants.

C. and J. PILLAR OF FIRE Canna Bed

This splendid collection of C. & J. Cannas makes one of the most gorgeous and handsome ornamental beds. These varieties grow of proportionate height and harmonize finely in color. This collection calls for a round bed 16 feet in diameter and requires 91 plants arranged as follows:

19 Pillar of Fire for centre (page 56), grows 6 to 8 feet high; bright flashing crimson.

42 Alsace, next tallest (described above) in two complete circles of white next to Pillar of Fire.

30 Queen Charlotte, crimson and gold (page 57). Dwarf grower for outside circle

This Magnificent Bed has been planted in different places and attracts so much attention that people come many miles to see it. It grows 8 feet high in centre; blooms continuously all Summer and Fall, and is a mass of grand flowers for months, altogether unequalled in gorgeous beauty. Price, for 91 Dormant Roots, selected as above, all labelled and packed in best manner to express here, \$7.25. Or, if you prefer bed of 3 circles and 10 feet in diameter, we will send 7 roots, properly selected, for only \$3.25, by express, or \$3.75, delivered free. (If you desire this Collection in Started Plants instead of Dormant Roots, please write us for prices.)

DIRECTIONS FOR PLANTING CIRCULAR BEDS.—Plant one Canna in centre of bed and the next six Cannas 18 inches apart in a circular row around the centre; each Canna in the first circle should be 18 inches away from the centre. Make each succeeding circle 18 inches farther away from centre than last one was, and use six more Cannas than were in the last circle. A bed thus planted will contain one Canna in the centre, six in the first circle, twelve in the second circle, eighteen in the third circle, and so on, all 18 inches apart.
